Dear Parent/Guardian

### **RAF Capability Day 27 June 2017**

On the 27 June I have arranged for the year 10 cohort to participate in an RAF capability day held at Kings' School. The event will be held in school and at the field and boys will be off timetable from normal lessons on that day except for period 5 which will be a normal lesson. The day is arranged into three different activities and your son will be participating in all events. One of the activities will be held at the school field as a consequence of this for this day your son is allowed to be in his school PE/Games kit all day. On this day I would be grateful if your son could bring a packed lunch as this will help smooth changeover of groups at lunchtime, some boys will be up at the school field.

They will be in their House for the day and working on the following activities

- 1) STEM- problem solving based on Maths, Science, Engineering and Technology.
- 2) Operation X – an interactive real time activity based upon a disaster rescue scenario, involving Team work, ICT communication skills, Geography, Maths, ICT.
- 3) Personal Development training (at the field) confidence development, team work, trust and working outside their comfort zone.

Each activity will be led by qualified RAF instructors and boys will be accompanied by teaching staff at all times during the activities.

We hope you will support your son in this exciting venture. If you would like any further information please feel free to contact me at school.

Yours sincerely

Mr M R Davis
